

ANALYTICAL SERVICES, INC.

It's a Matter of Quality!

Analytical Services Inc, introduces The Alytech Gas Mix Device

The AlyTech, GasMix™ gas standard preparation device is based on the mixing and/or dilution of two to four gas standards and may be used for a wide variety of applications. More than just a simple gas standard preparation device, GasMix™ can prepare and automatically inject user-prescribed calibrations; including samples requiring analysis.

Thanks to its dedicated software, single injections and fully automated / pre-programmed sequences can be performed in any laboratory environment. GasMix™ can fully integrate into your analytical application and can perform auxiliary functions such as analysis start and remote control of an external injection valve.

Benefits Include:

- Reduced Gas Cylinder Storage and Analyst Labor
- Built in **Audit Trail** function ensures traceability
- Regular automatic sequences may be saved and recalled at any time.
- User Friendly Man-Machine-Interface

Linearity, Accuracy and Repeatability guarantee the success of your analyses.

GasMix™ is ideal for:

- Gas chromatography (Added standard method and internal calibration)
- Trace Sulfur Analysis
- Soft drink industry & Brewery quality control
- Gas spectroscopy
- On-line gas analyzer calibration
- Specialty gases & Electronic Industries
